

מיכל איסוף 35 ליטר לחדרי ניתוח

SHARPSGUARD® 35 L

The SHARPSGUARD® yellow theatre is designed to be used upright to ease the disposal of long instruments such as staple guns as well as chest drains. It is ideal for theatres, acute medical areas and X-ray departments but is not recommended for high public access areas. It comes fully factory assembled, has a temporary closure for in-between use and a secure permanent closure for safe transportation. The robust pail handle allows for easy transportation and each container includes an absorbent pad to minimise the risk of any leakage.
