

MiniCollect® Funnel & Capillaries

The system is very flexible in application, as both blood transfer devices can be applied; the "funnel" or "capillary". It is thus possible to adapt to varying requirements and conditions of different blood collection situations.

MiniCollect® Funnel

The funnel can be used as a collection unit. It is simply pushed through the cap prior to collection; the blood droplets flow through the opening into the tube. After collection, the funnel is removed and disposed of in an impenetrable sharps disposal container.

MiniCollect® Capillaries

For capillary blood collection, a capillary tube may also be used as transfer unit. The different types of capillary tubes are coated with additives. The capillary type used should correspond to the tube type that is being filled. Eight capillaries are available. 4 different additives each in 2 lengths.

Article Overview

Item No.	Description	Packaging		
		Inner	2nd Inner	Outer
Funnels				
450421	Funnel	100 pcs.	1000 pcs.	12.000 pcs.
Capillaries				
450430	Capillary for Serum, 250µl	100 pcs.	1000 pcs.	10000 pcs.
450431	Capillary for Serum, 80µl	100 pcs.	1000 pcs.	10000 pcs.
450437	Capillary for NaF, 250µl	100 pcs.	1000 pcs.	10000 pcs.
450432	Capillary for NaF, 80µl	100 pcs.	1000 pcs.	10000 pcs.
450433	Capillary for EDTA, 250µl	100 pcs.	1000 pcs.	10000 pcs.
450434	Capillary for EDTA, 80µl	100 pcs.	1000 pcs.	10000 pcs.
450435	Capillary for Heparin, 250µl	100 pcs.	1000 pcs.	10000 pcs.
450436	Capillary for Heparin, 80µl	100 pcs.	1000 pcs.	10000 pcs.
