

ProbeFinder™

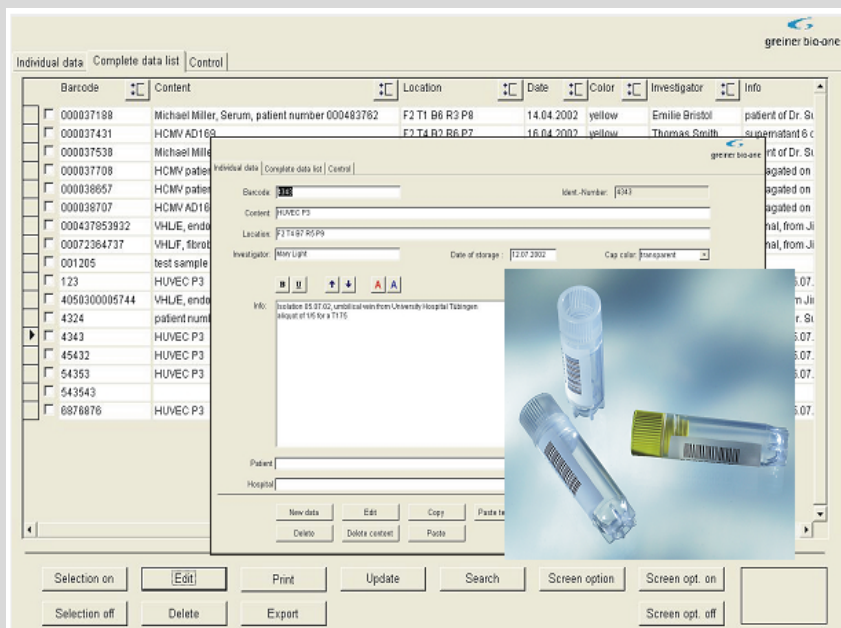

Software for Efficient Storage Management

The storage management of samples in laboratories has been an uphill task, until now. Non solvent-resistant labeling methods, illegible labeling by colleagues, changes in staff and incomplete descriptions or lists which are not up to date or even got lost, have often made it impossible to find or identify important samples.

Finally a solution is available!

The solution is preprinted barcodes (identification numbers) on Cryo.s™ used in combination with the new software for sample management, called ProbeFinder™.

ProbeFinder™ was especially developed for the purpose of recording samples fast and automatically, and for saving the data for efficient administration. ProbeFinder™ is easy to work with and has a number of functions to find, sort and search for data easily and quickly. The data lists can be printed or exported into Excel files. If necessary, optional password protection is available to prevent the access and manipulation of saved data by unauthorized people.

Features

- System requirements:
Pentium II with a min. of 300 MHz,
64 MB RAM, approx. 200 MB hard disk
memory, CD-ROM disk drive, min.
screen resolution of 1024 x 786 pixel
- Easy to install
- Data record, management, search,
keyword lists
- Complete or reduced data list printable,
export into Excel files

Ordering Information

Cat. No.	ProbeFinder™
881050	License for ProbeFinder™ Software for efficient storage management
881051	Demo-CD ProbeFinder™

Revision: February 2004
