# Order Form

## Barcode Service for Datamatrix Cryo Rack

Greiner Bio-One offers the Datamatrix Cryo Rack with a laser written linear barcode on its S1 side and/or a corresponding Datamatrix code on its bottom. Both codes carry the same ID and can be used to identify the rack in sample management and biobanking tasks. Both laser-written features may neither disintegrate nor fall off at temperatures as low as -196 °C.

## 1. Customer details

| | |
|---|---|
| Customer No. _____ | Phone _____ |
| Name _____ | Fax _____ |
| Institution _____ | E-Mail _____ |
| Street _____ | Shipping Address (if different than above) _____ |
| City / Zip Code _____ | _____ |
| Country _____ | |

## 2. Type of barcode

Please choose whether a linear barcode (Code 128 or Code 39), a Datamatrix code or a combination of both shall be applied. Note that if both coding options are chosen, the sequence of the linear barcode and the Datamatrix code will be identical. Please also specifiy the sequence start and end as well as the dimensions of the code.
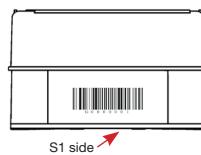

**Linear barcode**
