

VACUETTE® CLIX Safety Hypodermic Needle

- ↪ Single-handed activation
- ↪ Safety mechanism is an integrated part
- ↪ Audible “clix” indicates safety activation
- ↪ Double lock mechanism to fix the needle
- ↪ For use with syringes or blood collection devices

VACUETTE® CLIX Safety Hypodermic Needle

One simple “clix” to fix

By providing one of the safest products we strive to protect healthcare workers from risk of needlestick injuries. This new product is therefore fitted with a safety shield and is manufactured in accordance with the European Biosafety Network recommendations for the implementation of the European Directive 2010/32/EU, which is compulsory for the European Community and represents best practice on a global level.¹

The **VACUETTE®** CLIX Safety Hypodermic Needle can be used either for venous blood collections or for injections. This device is to be used by properly trained healthcare professionals only in accordance with the relevant instructions for use.

1 Activate safety mechanism on solid surface or with thumb

2 Audible click indicates safety mechanism activation

Beneficial product features

- Intuitive handling, minimal training needed
- Safety mechanism is an integral part of the device
- Bevel-up oriented needle for low-angle injections or blood collection
- Centred safety shield for optimal view to puncture site
- Standardised hub for compatibility with normed luer connectors
- Choice of safety activation: with thumb, or on hard surface
- Plastic shield colour-coded in accordance with ISO 6009
- Extensive product line with further product types available²
- Single-packed, sterile
- Latex-free, non-pyrogenic, non-toxic
